PROJECTS

- **XCrypto** A cryptocurrency tracker using **React.js**, fetching real-time data from **CoinGecko API**. The **Chakra UI** components ensure a sleek interface, while interactive graphs offer insights into price trends. This project exemplifies my skills in React.js, API integration, and UI design.
- **ClapClip** A dynamic video-sharing platform using **React.js**, featuring user-friendly **light and dark themes**. The application includes secure login/signup forms, empowering users to watch, upload, and share videos seamlessly.
- **TeckSpike** Created an optimized user interface with React.js, enhanced by **SCSS** for efficient styling. The project showcases my skills in building responsive and visually appealing designs.
- **Weather App** Crafted a dynamic weather app with 7-day forecasts for the user's current location, along with city-specific weather using **OpenWeather API**. Utilized Unsplash API to fetch location images. Demonstrates HTML/CSS/JS skills and API integration.
- **QR Code Scanner** Developed a QR code scanner using HTML, CSS, and JS, enabling users to quickly access embedded information. Demonstrates proficiency in front-end technologies and interactive design.
- **Quality Forum** Developed a **Python**-based hostel review system for users to submit and rate hostel experiences. Demonstrates programming skills and database management expertise.
